Scoring Procedure	<p><u>Step 1: Transform Score</u></p> <p>Items are reversed scored and linearly transformed to a 0-100 scale as follows: 0=100, 1=75, 2=50, 3=25, 4=0</p> <p><u>Step 2: Calculate Scores by Dimensions</u></p> <ul style="list-style-type: none"> • If more than 50% of the items in the scale are missing, the scale scores should not be computed. • Mean score = Sum of the items over the number of items answered. <p><u>Total Score:</u> Sum of all the items over the number of items answered on all the Scales.</p>
Interpretation and Analysis of Missing Data	<p>If more than 50% of the items in the scale are missing, the Scale Scores should not be computed.</p> <p>If 50% or more items are completed: Impute the mean of the completed items in a scale.</p>
